design Brian Rasmussen 2012

**Scenografica lampada realizzata con fogli in alluminio di diverse misure sovrapposti che rendono la forma dinamica, come un'onda in movimento. Al centro un cilindro luminoso in vetro soffiato si riflette sugli elementi, creando un suggestivo gioco di luci ed ombre sempre diverso, a seconda delle angolazioni. Disponibile in colore verniciato bianco opaco.**

A suspended pendant consisting of differing sizes of formed aluminium sheets. These are placed one over the other giving the fitting a dynamic look similar to a wave's. The lamp is located inside the blown glass cylinder in the centre. The light reflection makes a suggestive play of light and shadow according to the perspective. Matt white painted pendant and table lamps.

Lampe pittoresque réalisée avec des feuilles d'aluminium de différentes mesures superposées de manière scalaire autour d'un cylindre lumineux en verre soufflé, qui reflète la lumière sur les éléments. Le jeu d'ombres et de lumières, qui varie toujours en fonction des angles, rend la forme dynamique et suggère un mouvement d'ondes. Cette lampe est disponible peinte en couleur blanc opaque, et dans les versions à suspension et de table.

Wirkungsvolle Lampe aus Aluminiumblättern unterschiedlicher Größe. Sie sind nach ihrer Größe um einen leuchtenden Zylinder aus geblasenem Glas angeordnet, der das Licht auf die Elemente zurückwirft. Ein je nach Winkel sich ständig wandelndes Spiel aus Schatten und Licht gibt der Form eine gewisse Dynamik und lässt eine Wellenbewegung entstehen. Die Lampe ist in den Farben Mattweiß, als Hänge- und als Tischlampe lieferbar.

Espectacular lámpara realizada con hojas de aluminio de diversos tamaños, superpuestas de modo que se escalonan en torno a un cilindro luminoso realizado en cristal soplado, que refleja la luz sobre los elementos que la conforman. El juego de luces y sombras, siempre diverso dependiendo de los diferentes ángulos, hace que su forma resulte dinámica y sugiere un movimiento ondoso. La lámpara se encuentra disponible pintada en color blanco mate, tanto en su versión de colgar como de mesa.

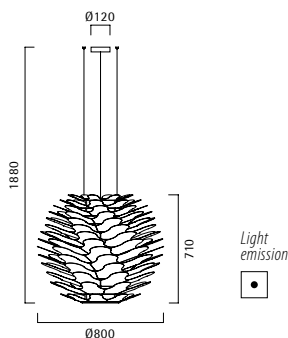

Живописный светильник, изготовленный из алюминиевых листов различных размеров, наложенных друг на друга вокруг светящегося цилиндра из дутого стекла, который отражает свет на элементы. Игра света и тени, всегда различная в зависимости от угла зрения, создает динамичную форму и волнообразное движение. Светильник матового белого цвета предлагается в подвесном или настольном варианте.

# MINI LIBERA

design Brian Rasmussen 2013

Serie di lampade con struttura in alluminio nella forma a tronco di cono. La parte superiore del paralume presenta delle fessure a raggiera che danno particolarità e carattere al design semplice e lineare dell'oggetto. Disponibile in due colori: interamente verniciata bianca opaco oppure nero opaco all'esterno e bianca opaco all'interno. Illuminazione a LED. Diffusore prismatico trasparente all'interno. Alimentatore incluso.

Tapered Cone-shaped aluminium LED lamps. The top of the lamp has some simple detail cut-outs, enhancing the linear design of the lamp with a smart, distinctive touch. Finishes are matt white painted inside/outside and matt black outside/matt white inside. Transparent prismatic diffuser within the base of the lamp. Ballast included.

Série de lampes avec une structure en aluminium, caractérisées par leur forme en tronc de cône. La partie supérieure de l'abat-jour présente des fentes en configuration radiale, qui permettent l'aération et donnent en même temps un caractère particulier au design simple et linéaire de cet objet. Disponible en deux couleurs: entièrement peinte en blanc opaque, ou bien noir opaque à l'extérieur et blanc opaque à l'intérieur. Eclairage à LED. Diffuseur prismatique transparent à l'intérieur. Alimentation incluse.

Amak ist eine Lampen-Modellpalette mit einer Aluminiumstruktur, die durch ihren keilförmigen Ständer besticht. Der obere Teil des Schirms ist mit strahlenförmigen Schlitzen für eine effiziente Kühlung versehen mit gleichzeitig der stilistischen Aufgaben, ein einfaches und geradliniges Design entstehen zu lassen. Sie ist mit zwei Farben erhältlich: matt weiß lackiert oder Außen mattschwarz und Innen matt weiß. LED Leuchten. Innen durchsichtiger prismatischer Lichtverteiler. Der Konverter ist inklusive.

Serie de lámparas con estructura de aluminio con forma de cono truncado. La parte superior de la pantalla incluye unas fisuras radiales que permiten su aireación y, al mismo tiempo, le dan singularidad y carácter al diseño simple y lineal del artículo. Se encuentra disponible en dos colores: totalmente pintada de blanco mate o, también, negro mate en su exterior y blanco mate en su interior. Iluminación con LED. Difusor en forma de prisma transparente en su interior. Alimentador incluido.

Amak представляет собой серию светильников с алюминиевой структурой, характеризующейся формой усеченного конуса. Светильник может быть выполнен в двух цветовых вариантах: полностью окрашенный в матовый белый или матовый черный снаружи и матовый белый внутри. Используются светодиодные лампы, тональности, внутри установлен прозрачный призматический диффузор. Имеется встроенный электронный балласт.

design Mario Mazzer 2012

**Questa lampada a forma trapezoidale nasce dalla parete e si espande verso l'esterno con una luce riflessa. Verso esprime una visione di continuità tra parete e luce, espandendo lo spazio verso l'esterno con un'illuminazione fluida. Struttura in alluminio, illuminazione a LED tonalità Natural White 4100°K e Warm White 3000°K. Alimentatore incluso.**

Irregular shaped wall fitting, jutting from the wall and spilling indirect light outwards. Aluminium structure. LED temperature is Natural White 4100°K and Warm White 3000°K. Ballast included.

Lampe de forme trapézoïdale, qui part de l'idée de faire naître la lumière du mur, et de la projeter vers l'extérieur grâce à une forme qui crée une sorte de continuité entre la source de lumière et le mur. Réalisée en aluminium peint en blanc opaque, cette lampe peut être fixée selon des orientations différentes. Eclairage à LED température blanc naturel 4100°K et blanc chaud 3000°K. Alimentation incluse.

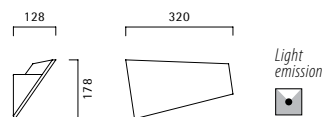

Trapezförmige Lampe, für die die Idee Pate stand, das Licht aus der Wand heraus entstehen zu lassen und dieses nach außen zu projektieren und zwar dank einer Form, durch die eine Art Durchgängigkeit zwischen Leuchtquelle und Wand entsteht. Hergestellt ist sie aus matt glänzend lackiertem Weiß, die Lampe kann unterschiedlich ausgerichtet montiert werden. Lichtquelle: LED in Lichtfarbe NW 4100°K und in WW 3000°K. Der Konverter ist inklusive.

Lámpara con forma trapezoidal nacida con la idea de hacer surgir la luz de la pared y proyectarla hacia el exterior gracias a una forma que crea una especie de continuidad entre la fuente luminosa y la propia pared. Realizada en aluminio pintado de blanco mate, la lámpara se puede fijar a la pared orientándola en diversas direcciones. Iluminación con LED tonalidad blanco natural 4100°K y blanco cálido 3000°K. Alimentador incluido.

Настенный светильник трапецеидальной формы, который несет идею рождения света от стены и его отражения наружу благодаря форме, которая создает своеобразную непрерывность между источником света и самой стеной. Светильник, выполненный из матового белого алюминия.

Используются две светодиодные лампы 6 Вт 220-240. тональности (на выбор теплого 3000°K или холодного 4100°K света). Имеется встроенный электронный балласт.

### Class

Classe I - Class I - Classe I - Klasse I - Clase I

Apparecchio nel quale la sicurezza elettrica è garantita da un conduttore supplementare di protezione (messa a terra) collegato alla struttura metallica della lampada.

A light fitting whose safety is guaranteed by an additional protective conductor (earth) connected with the metal frame of the lamp.

Classe II - Class II - Classe II - Klasse II - Clase II

Apparecchio nel quale la protezione contro la scossa elettrica si basa unicamente sul doppio isolamento e/o isolamento rinforzato in ogni parte e senza dispositivo di messa a terra.

Light fittings whose safety is guaranteed by the double reinforced insulation of conductive parts, with no earth.

## Direttiva RAEE: Rifiuti di Apparecchiature Elettriche ed Elettroniche

Il 25 Luglio 2005 il Consiglio dei Ministri ha recepito con Decreto Legislativo no 151 la Direttiva Europea 2002/95/CE e 2002/96/CE relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche e dello smaltimento dei rifiuti da essi derivanti. L'obiettivo è promuovere una logica di sviluppo sostenibile nel settore delle apparecchiature elettriche ed elettroniche, di cui gli apparecchi di illuminazione ne fanno parte, ai fini di un corretto trattamento dei prodotti a fine vita e ciò può attuarsi attraverso la piena conformità alla Direttiva RAEE. Il Produttore, come definito dal Dlgs no 151, dovrà farsi carico dei costi di gestione che comprendono la raccolta, presso gli impianti di stoccaggio provvisorio e dello smaltimento dei rifiuti degli apparecchi di illuminazione immessi sul mercato dopo l'Agosto 2006. Per adempiere a questi obblighi di legge LUCENTE S.r.l. ha deciso di avvalersi del supporto del Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milano Tel 02 33600732.

Gli apparecchi di illuminazione saranno marcati in modo da identificare il Produttore e riportare il simbolo del cassonetto barrato, indicante la raccolta differenziata separata dal resto dei rifiuti urbani, inoltre saranno soggetti al contributo di smaltimento, differenziato per fascia di peso. Gli utenti finali potranno consegnare i suddetti apparecchi senza costi aggiuntivi presso i punti di raccolta appositamente realizzati e comunicati dal Consorzio. I distributori sono obbligati ad assicurare al momento della fornitura di una nuova apparecchiatura, il ritiro gratuito, in ragione di uno ad uno, della apparecchiatura usata. L'obbligo di informazione relativo al contributo dovrà essere mantenuto visibile in fattura, da parte del Produttore, fino al 13 febbraio 2011.

I prodotti elencati con il relativo peso netto alla fine del presente catalogo saranno soggetti al contributo di smaltimento a seconda della fascia di peso di appartenenza:

- fascia 1: apparecchi il cui peso è compreso tra 0 e 2 Kg
- fascia 2: apparecchi il cui peso è compreso tra 2 e 8 Kg
- fascia 3: apparecchi il cui peso è superiore a 8 Kg

### Direttiva RoHS

Il Decreto Legislativo sopra menzionato incorpora anche la Direttiva 2002/95/CE - RoHS - Limiti d'uso di alcune sostanze pericolose - relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche.

A partire dal 1° Luglio 2006 tutte le nuove apparecchiature elettriche ed elettroniche immesse sul mercato non dovranno contenere o contenere in misura limitata sostanze quali: Piombo, Mercurio, Cadmio, Cromo esavalente, Bifenile polibromurati (PBB), Eteri difendi polibromurati (PBDE).

## WEEE Directive: Waste Electrical and Electronic Equipment

On the 25th July 2005, the Council of Ministers incorporated the European Directive 2002/95/CE and 2002/96/CE – related to the reduction of hazardous substances in electronic and electrical equipment and their waste disposal - into Italian legislation with the Legislative Decree number 151. The objective is that of promoting a notion of sustainable development within the electronic and electrical equipment sector, to which lighting equipment belongs, with the aim of correctly treating the products once they have reached the end of their lives; this may be accomplished by fully complying with the WEEE Directive. The Manufacturer, as defined by the Legislative Decree number 151, will be responsible for the management costs which include collection from temporary storage facilities and the costs for waste disposal of the lighting Equipment. In order to fulfil these legal obligations LUCENTE S.r.l. have decided to call upon the support of the ECOLIGHT Consortium; Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milan Tel. +39 02 3360 0732.

The lighting equipment will be marked in such a way as to identify the Manufacturer and show the symbol of the crossed wheeled bin, which indicates a separate collection from the rest of the urban waste, the equipment will also be subject to a disposal contribution and will be distinguishable by its weight range. The contribution will be determined prior to the law coming into force and will be made official by the ECOLIGHT Consortium. The end users will be able to deliver the above-mentioned equipment without any add-on costs to the authorised collection sites as notified by the Consortium. Distributors are obliged to ensure a free take-back service of the used equipment, at the time of the supply of a new unit, on a one-to-one basis. The Manufacturer has a duty to supply and maintain information related to the amount of contribution and this must be shown on invoices until 13th February 2011.

The products listed in this catalogue will be marked with range symbols. Each symbol should be shown against its relevant range within the following table and each range will be subject to a different disposal contribution:

- range 1: the equipment weight which is between 0 and 2 kg
- range 2: the equipment weight which is between 2 up to 8kg
- range 3: the equipment weight which is over 8kg

### The RoHS Directive

The above-mentioned Legislative Decree has also implemented the RoHS 2002/95/CE Directive. The Restriction of the use of certain Hazardous Substances (RoHS) in electrical and electronic equipment.

As from 1st July 2006, all new electrical and electronic equipment put on the market must not contain, or contain limited quantities of, certain substance, namely: Lead, Mercury, Cadmium, Hexavalent chromium, Polybromide biphenyls (PBBs), Polybromide diphenyl ethers (PBDEs).
